

Supplementary Table S1.

RAVLT z-Score Deviations from Normative Data by CSA History

Age Range	Variable	Normative (z)	CSA Group (z)	p-value (vs. Norm)	No CSA Group (z)	p-value (vs. Norm)
20–29	Total Recall	0.0	-0.1 ± 0.2	.343	0.2 ± 0.3	.010**
	Delayed Recall	0.0	-0.8 ± 0.3	.139	-0.2 ± 0.2	.823
30–39	Total Recall	0.0	-1.2 ± 0.4	.066	-0.9 ± 0.3	.436
	Delayed Recall	0.0	-1.5 ± 0.4	< .001***	-1.1 ± 0.3	.020*

Note. CSA = Childhood Sexual Abuse; RAVLT = Rey Auditory Verbal Learning Test; z = z-score. Normative data derived from Strauss et al. (2006). Italicized values indicate clinically significant deviations ($z \leq -1.0$). $p < .05$. ** $p < .01$. *** $p < .001$.
